PROFESSIONAL SUMMARY

Experienced Full Stack Developer skilled in building responsive, user-friendly web pages and applications. Proficient in front-end and back-end technologies, with a focus on delivering scalable, efficient solutions. Collaborative team player with experience working in cross-platform teams to deliver high-quality projects. Passionate about leveraging technology to solve problems and improve user experiences.

TECHNICAL SKILLS

Programming Languages: JavaScript , TypeScript , C

Frontend Technologies: React.js, WordPress, Next.js, Redux, HTML5, CSS3, TailwindCSS, Bootstrap

Backend Technologies: Node.js, Express.js, RESTful APIs, WebSockets, JWT Authentication

Databases: MongoDB , MySQL , Notion, Firebase

DevOps & Deployment: Docker, S3 Bucket, CI/CD, Git , GitHub, AWS, Cloud Services

Development Tools: VS Code, MongoDB Compass, MySQL Workbench, Figma, Postman,

Experience

Full Stack Engineer

ysquare Technology ,Chennai

📅 June 2024 - January 2025

- Contributed to the development of MegaCabs, a React-based Transport Management System featuring a complex dashboard with real-time status updates and dynamic data tables for fleet and booking management
- Engineered and optimized data-driven UI components for better performance and responsiveness, leveraging React hooks, context API, and advanced state management techniques
- Collaborated with cross-functional teams to deliver new features and performance enhancements to production systems.
- Implemented server-side actions and API integrations for real-time form submissions to Notion databases, enhancing workflow automation
- Integrated WordPress with GraphQL for efficient headless CMS architecture, enabling dynamic content rendering and reducing maintenance overhead
- Partnered with the SEO and performance team to implement search engine optimization strategies and frontend refinements, leading to enhanced page rankings and improved Core Web Vitals

Full Stack Developer

Self-employed/Freelancer

📅 February 2023 - May 2024

- Collaborated on multiple projects, including e-commerce platforms and program registration systems, handling full-stack development from design to production.
- Delivered end-to-end solutions, working closely with clients to understand their needs and implement features using React.js, Node.js, and MongoDB.

- Developed several personal projects to explore new technologies and improve skills, including projects focused on optimizing front-end and back-end performance.
- Gained hands-on experience with web development frameworks, DevOps processes, and system architectures to ensure scalability and robustness.

PROJECTS

Venue Booking Solution – Mandabam

[Live Link](#) | [GitHub - Frontend](#) | [Backend](#)

Mandabam is your go-to venue booking website that takes the hassle out of finding the perfect space for your events. Whether it's a wedding, corporate event, or a cozy gathering,

Features:

- **Socket IO**:users and vendors can chat effortlessly,
- **Razorpay** :for secure and hassle-free transactions.
- **Tailwind css** :for responsive web design.
- **Admin Control** :can efficiently manage both users and vendors.
- **Role Based Control** :caters to three roles - Users, Admins, and Vendors, ensuring a tailored experience for all.

Technologies:Express.js,Mongoose, AWS, JWT, Socket.IO, Cloundinary, Razorpay, NGINX, Multer, Nodemailer, Axios,React js, Redux, HTML, CSS, Tailwind CSS GitHub

E-Commerce Platform - VK Fashion

[Live Link](#) | [GitHub](#)

Fashion-focused e-commerce platform that features a secure payment system, as well as the ability to create accounts and track orders for customers. This position demanded collaborative efforts to deliver a seamless shopping experience tailored to the target audience.

Features:

- **RESTful APIs**:seamless communication between frontend and backend.
- **Payment gateway**: **Razorpay**,Cash on Delivery (COD) methods and Wallet feature.
- **Architecture**:MVC.

Technologies:Express.js,Mongo db,Node Mailer, Razorpay, NGINX, Multer, Nodemailer,GitHub, Figma

MINI PROJECTS

React Graph-QL CRUD

GitHub: [FrontEnd](#) | [BackEnd](#)

- The project is a client-side React application demonstrating CRUD functionality through GraphQL communication with a backend server. It leverages Apollo Client for handling GraphQL operations.

Technologies:React.js,Apollo ,graphql, Redux Toolkit, Node.js, Express.js, MongoDB, REST APIs, Authentication

OLX Clone

[GitHub](#)

- Utilized Firebase Firestore for backend and data storage, enabling seamless product addition with images for efficient listing in a product application.

Technologies: React.js, Node.js, Express.js, REST APIs

EDUCATION

Advanced Full Stack Web Development (MERN Stack)

2023 - 2024

Brototype Calicut, Kerala, India

Bachelor of Computer Application

2017 - 2020

IHRD College, Calicut
